Skill Level: 2 Average

Time Investment: 1-2 hours

Step 1: Remove Taillights by removing the two 10mm screws.

Note: Place taillights off to the side carefully. Do not scratch up your taillights by placing them on the lens.

Step 2: Print two copies of the template from the Toyota instructions. You'll need one for driver and passenger side.

Step 3: Cut the template out and tape it to the bed like pictured.

Note: You will be drilling holes on the driver and passenger side.

Note: Painters tape is great to hold the template in place.

Step 4: Use your 7/64th drill bit to mark the three holes on the template.

Note: Middle hole will be for the 3/4 inch hole saw

Step 5: Remove the template then use spray bottle of water to wet the 3 holes. Proceed with drilling the top and bottom marks with your 7/64th drill bit.

Step 6: Use 3/4 inch hole saw to cut a hole on the middle mark from the template.

Step 7: Remove grommet from bed lighting harness as it isn't used in the install.

Note: You can cut the grommet off or pull it down and over the connector if you want to save it.

Step 8: Feed the bed lighting connector through the hold you drilled.

Note: Make sure to use the correct bed light on the correct side, driver or passenger. They are marked from factory.

Step 9: Use the two stainless steel screws to mount the bed light in place on the driver and passenger side.

Note: Make sure Bed light is facing down and toward the cab of the vehicle.

Step 10: There is a small hold behind the taillights you can pull the bed lighting harness through.

Step 11: Route the bed lighting harness down in the taillight cavity. You can follow the taillight wiring. Zip tie the cargo bed lighting harness to the taillight harness.

Step 12: Under the vehicle, run the bed lighting harness through this gap. Route driver's side and passenger sides bed lighting harness to the spare tier.

Step 13: Zip Tie the bed lighting harnesses together at the spare tire.

Step 14: Connect the bed light harness from driver and passenger into the main body harness that comes in the kit. Secure any slack with zip ties.

Step 15: Route the bed lighting main harness along the body harness running along the bottom of the vehicle. Make sure not to damage the grommet on the main harness as it will be used later.

Step 16: Around the driver's door area you'll see a grommet.

Step 17: Remove trim from driver's side door. Pull straight up and place to the side.

Step 18: The factory grommet is under the driver's seat. You can fit your hand in there to pull the main harness up into the cab.

Step 19: Attach new grommet into the hole under the driver's seat.

Step 20: Route bed lighting harness along factory harness that would be under the trim.

Step 21: Remove kick panel on driver side, there is a plastic nut that spins off to be able to remove the panel.

Step 22: Remove kick panel and place it off to the side.

Step 23: Remove connector and tap into green wire for power.

Step 24: Tap into the smallest gauge white wire with a black stripe for ground.

Step 25: Reassemble the vehicle and use the third brake light switch to power on the new bed lights. All three lights will illuminate, two new bed lights and the third brake light.

Step 26: Enjoy your purchase and again thank you for choosing Infotainment.com for your upgrades.
