Skill Level: 1

Time Investment: 1 hour

Step 1: Angle your factory rear view mirror down to get better access to the wire cover. With two fingers pull down the plastic wire cover and place it off to the side.

Step 2: The plastic wire cover is made up of two parts. This piece will be reused with the new mirror.

Step 3: Disconnect the factory wire from the rear of the factory rear view mirror.

Step 4: Loosen the T20 Torx screw. You don't need to remove the screw fully.

Step 5: Now that the screw is loose you can lift the factory mirror off its connector.

Step 6: Take your new homelink mirror and if you got version two or three then connect it to the factory connector.

Step 7: You can hide the connector above the headliner for the neat and clean finish.

Step 8: Slide the new mirror into place on the factory connector on the windshield.

Step 9: Secure the mirror into place by tightening the T20 Torx screw.

Step 10: Put the wire cover back into place. It just snaps into place.

Step 11: Turn on the vehicle and the new rear view mirror will power on. First you'll see the compass light up, then auto dim will work. All you have to do is setup your Garage door opener or any other device compatible with the Homelink mirror.

Step 12: Enjoy your purchase and again thank you for choosing Infotainment.com for your upgrades.
