

Install guide for (2016-2023 Toyota Tacoma OEM LED Head Lights)

Before you begin, make sure to checkout our install video. We spend a good amount of time getting these videos just right so that they will be a helpful guide.

Requirements

2016+ Toyota Tacoma

Part lists

- TRD Driver Headlight
- TRD Passenger Headlight
- Harness conversion for headlights

Tools required for installation, socket sizes & whatnot.

- 10mm Wrench/Socket
- Flathead Screwdriver
- Panel Removal Tool

Skill Level: 3

Time Investment: 1-2 hours

Step 1: First remove the front grill, there are two clips and two 10mm bolts to remove.

Note: Use the Flathead Screwdriver on the plastic clips to release them.

Step 2: With the grill removed, want to remove the plastic clips holding the bumper in place. This will give you more room to remove factory headlights and install new headlights.

Step 3: Remove the two top 10mm bolts from the headlight. There is one bolt still holding the headlight in place.

Step 4: Remove the 10mm bolt from the wheel well and one plastic clip.

Step 5: Pull the wheel well out of the way and disconnect the retainer clip holding the bumper by reaching in and pulling toward you. You'll hear a pop when the clip comes free.

Step 6: Now with the bumper loose, you can pull the bumper down to expose the last 10mm bolt to remove to free factory headlight. Remove the bolt.

Step 7: After all three bolts have been removed, you can remove the factory headlight. There is one clip toward the grill that will hold the headlight in place, this will come free with a good pull.

Step 8: Disconnect all four bulb harnesses from factory headlight and place factory headlight off to the side.

Step 9: Connect new TRD conversion harness to the three factory headlight connectors and the block off plug.

Note: High beam and low beam connectors look identical but they're different colors. You need to match the yellow factory connection to the conversion harness connector with yellow wire.

Step 10: Mount the relay and transistor to the frame of the vehicle. There is a spot to mount both behind the headlight.

Step 11: Zip tie the new conversion harness so they aren't dangling into your engine bay.

Step 12: Connect new headlight's one connector

Step 13: With the headlight plugged into the new conversion harness, you are free to mount the new headlight.

Note: Be cautious not to scratch your new headlight lens when mounting.

Step 14: Once the headlight is in place, you can snap in the clip toward the radiator and the two 10mm bolts on the top of the headlight.

Step 15: Put the third 10mm bolts into place along the bottom of the headlight.

Step 16: Now that the headlight is securely mounted into place, you can proceed with reattaching the bumper into place and putting the plastic clips into place.

Step 17: In the wheel well reconnect the 10mm screw and the plastic retaining clip.

Note: Colder environments make the wheel well hard to move back into place. With some work you'll get it back into place.

Step 18: Repeat with process with the opposite site of the vehicle. The process is the same just mirrored.

Step 19: Install the grill by reattaching the two plastic clips and the two 10mm bolts.

Step 20: Check out your newly installed Upgrade!

Step 21: Enjoy your purchase and again thank you for choosing Infotainment.com for your upgrades.
