Before you begin, make sure to checkout our install video. We spend a good amount of time getting these videos just right so that they will be a helpful guide.

Part lists

- IOR XM Compatible Module
- SiriusXM Antenna (OEM or Other)
- Fakra Cable Extension

Tools required for installation, socket sizes & whatnot.

- Light Source
- Pry Tool
- Flathead Screwdriver
- T15 Torx Screwdriver
- 10mm Wrench/Socket

Skill Level: 3

Time Investment: 2-3 hours

Step 1: Behind the glove box, you'll find the IOR module. It is held in with two plastic tabs. If you pull these back the module can slide out.

Step 2: Before sliding the factory IOR module out, disconnect all the connections to the module.

Note: Take a picture of the connections for your reference.

Step 3: Remove the old IOR module by sliding it out then placing it off to the side. Then slide in the new IOR XM module in its place.

Step 4: Last thing is the XM antenna if needed. Lets start with the XM antenna. Depending on what you ordered, you could have no antenna to install, soft mount antenna or a hard mount antenna.

Step 5: To install the hard mount antenna, start by popping over the screw covers on the driver's pillar.

Step 6: With the two 10mm screws removed, you can pop the driver's pillar out.

Step 7: Next we need to remove the screw cover from the drivers side mirror. Use your pry tool to make it come free.

Step 8: Next remove the three T15 screws holding the sun visor in place as well as the sun visor hook which is only held in with one T15 screw.

Step 9: You can now pull the corner of the headliner down just enough to reach your factory antenna so that you can replace it.

Step 10: You'll reach in to remove the one 10mm bolt holding on the factory antenna, once the bolt is removed as well as the small bracket, disconnect the fakra cable and pull factory antenna out.

Step 11: Route the new antenna's cables into the hole on the roof.

Step 12: Mount the antenna and secure in place with the 10mm bolt as well as the bracket.

Step 13: You can put the roof liner back up. The weather stripping along the top of the driver door will need to be popped back into place. Also reinstall the sun visor.

Step 14: Connect the dual barrel fakra back together in the driver's pillar. Plug in the teal fakra into the yellow/curry color fakra then route the cable down the opening at the base of the driver's pillar.

Step 15: Pop out the trim panel going down to the driver's foot well.

Step 16: Route the antenna fakra down to the driver's foot well. Zip tie along the way for the neat and clean finish.

Step 17: Route the fakra over the to passenger foot well using the same opening we used for the OnStar harness. The teal fakra from the antenna plugs into Yellow/Curry color fakra on the IOU module. Far right side of module.

Step 18: Enjoy your purchase and again thank you for choosing Infotainment.com for your upgrades.
