Skill Level: 3

Time Investment: 2-3 hour

Step 1: For safety, disconnect the negative terminal from the battery before starting install. Once that is done you can proceed with installing the HMI module first. It is located on the driver's side kick panel. Looking up and to the left you'll see the factory HMI module.

Note: Take a picture of the connections for your reference.

Step 2: Disconnect all the factory connections to the factory HMI. Once done there are two tabs to push out to free the factory HMI module. It will slide down for removal.

Step 3: When installing the HMI module. You'll notice if you upgraded to the IO6 with built in Navigation that there is a new blue fakra connector on the far left. This is where the GPS antenna plugs into. Reconnect your factory GPS antenna or plug in the new GPS antenna and route the antenna under the dash. Make sure no metal is above the antenna and it will get good signal.

Step 4: Now that the upgraded HMI is installed and GPS antenna connected lets move on to installing the ACM. On passenger side, pull the carpet back to expose the screws on a metal bracket. Remove the four 7mm screws and one 9mm screw as well as the two 9mm nuts at the bottom.

Step 5: Move the bracket off to the side, behind it you'll see the vehicle's BCM. There is a tab on its right you can push in to release the BCM.

Step 6: With the BCM out of the way. Behind the plastic bracket, is where the factory ACM is located. With some work you can get the ACM to come free, disconnect the ACM connections.

Note: Take a picture of the connections for your reference.

Step 7: Install the upgraded ACM into the same spot. Reconnect all the factory connections and mount the ACM back behind the plastic bracket. Reinstall everything back where it was then lets move on to the USB hub.

Step 8: Last part is to install the new USB hub into the armrest. Using a pry tool or flathead screwdriver push the side of the factory USB hub in as there are plastic clips on either side of the hub.

Step 9: Once you have the factory USB hub removed. Take the new USB hub and plug in the two factory connections to the rear of the USB hub.

Step 10: Slide the new USB hub into place, you'll hear it clip into place.

Step 11: Once the installation of the upgrade is done. Go into Settings, then scroll down to resets, then perform the three resets on the radio. Wait for them to finish then you can start to test your new upgrade.

Step 12: Thank you for your purchase! Enjoy the upgrade!

Return Policy/Warranty Terms

Infotainment.com 30-Day Return Policy:

Infotainment.com offers hassle free returns within 30 days from the date-of-delivery for a full refund unless otherwise stated on the product advertisement (such as a custom or special order item). The customer may choose to cancel their order prior to shipping or fulfillment without penalty.
